SENSORS

# IRGASKIT

FOR CO<sub>2</sub> and selected Hydrocarbons

## KEY FEATURES

- Flexible compact modular design
- Separate sensor, processing and signal conditioning electronics
- Easy to use digital communication
- Dual wavelength technology, long term stability
- PC based software for graphing and data logging
- Simultaneous analogue current and voltage outputs

## A NEW GENERATION OF GAS SENSORS | FAST, ACCURATE AND RELIABLE

The IRgaskiT® range of dual-beam infrared sensors, offer users high performance, true dual-beam detection infrared, temperature compensated measurement of CO<sub>2</sub> and selected hydrocarbons. The result is a low drift, high accuracy OEM sensor with single button calibration and optional simultaneous voltage and current outputs.

Digital communications are easy to utilize and IRgaskiT® PC data logging software is also available.

The infrared gas sensor offers these features with the further advantages of a very compact design and low cost. The IRgaskiT® design is ideal for a wide variety of applications particularly where space and low power consumption (<1W) are important issues.

Each module of the IRgaskiT® has been designed to allow the user maximum flexibility when choosing a solution that meets their application requirements.
